

VOTE “NO” on AB 2253 (Boerner)

Assembly Floor Alert AB 2253 (Boerner) – Oppose

Author proposed floor amends do not address:

- Impacting more than just Plastics and the Bottle bill -- Impacts a wide array of consumer product sectors.
- Effectively Banning Internationally Recognized Accounting Methods.
- Putting California at odds with more than 86 countries, including EU.
- Substantially increasing costs to EPR, including SB 54 (Allen), a \$21 billion packaging law.
- California & Federal laws already bar false recycled content claims. The UCL, the False Advertising Law, and federal FTC Green Guides all prohibit exactly the consumer deception this bill claims to target.
- The bill is really about prohibiting new technology. Banning the accounting methodologies shuts down new recycling investment.
- Increasing litigation by creating new private enforcement liabilities.

Coalition offered amends that do address the stated intent of increasing consumer transparency.

NO OPPOSITION REMOVED
